Dear Rebecca,

I am writing in regards to the Somers tie-plant issue.

As a Homeowner located across the road from the old tie yard, I am not only concerned with the looks of the property detracting from my property value; but, the tall grass is a real concern as a fire hazard. It was my understanding that the land was to be planted with grass and be maintained. I am wondering if this is the case.

My other concern is the heavy trucks and equipment that is shaking my home and litterly causing cracks in my home structure.

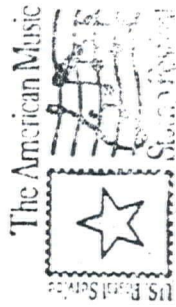

Sincerely,

Shirley O'Lexey
